

LAST LASER

ONE SYSTEM. ALL TECHNOLOGIES. TOTAL HAIR REMOVAL

No Hair Left Behind, Not Even White

FDA Technology Certified FDA

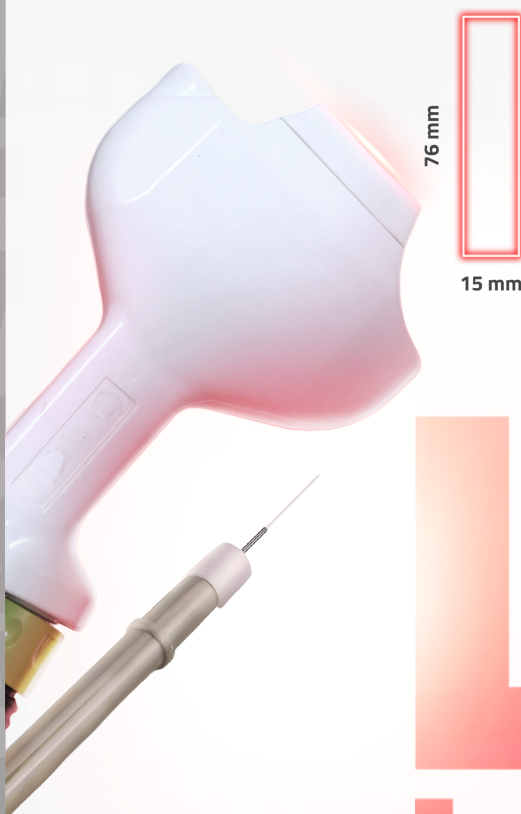

3 Wavelengths. One Ultimate Solution

Discover the power of Last Laser

Our cutting-edge IPL system integrates three precise wavelengths (Alexandrite, Nd:YAG and Diode) in a single handpiece — targeting hair follicles at multiple depths. This tri-spectrum technology ensures superior efficacy across a broad range of skin tones and hair types. From fine facial hair to coarse body hair, Last Laser IPL delivers optimal, long-lasting results. And for the most stubborn white hairs — the system is equipped with smart electrolysis technology, ensuring total and permanent hair removal.

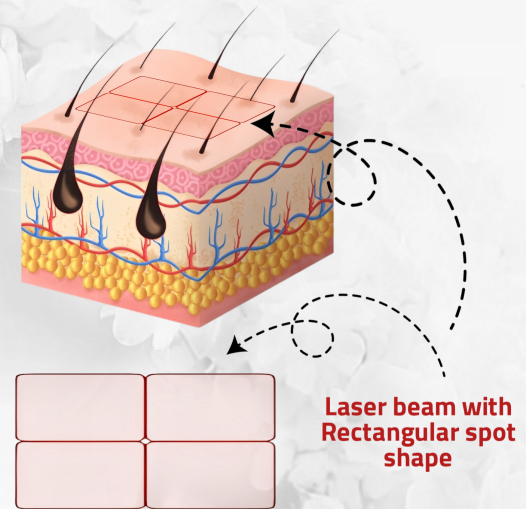

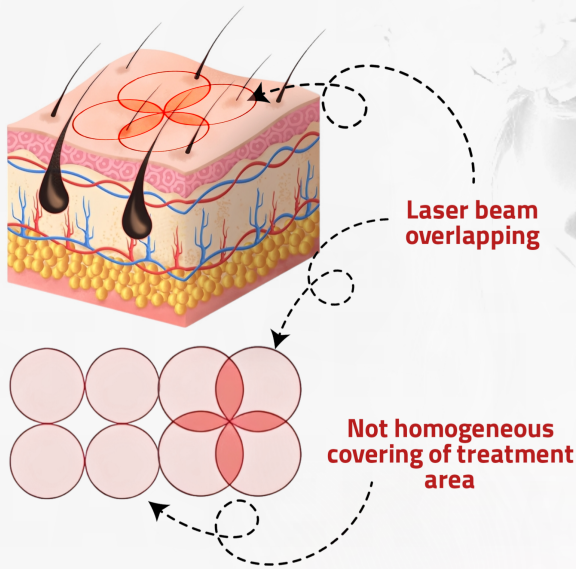

Why Last Laser?

- ✓ High Power, Maximum Results
- ✓ Superior Air-Cooling System (Zimmer)
- ✓ Fast, Efficient Treatments — Full body = 25 min
- ✓ Large Rectangular Spot Size (76 mm)
- ✓ Disposable Spot Size Silicone Cover (Face + Body)
- ✓ Smart Electrolysis for White & Stubborn Hair
- ✓ Silent System
- ✓ Low Cost & High Profit

Rectangular Spot Size Design

Optimized rectangular spot shape ensures even energy distribution, precise targeting, and efficient coverage for faster, more uniform treatments. No overlap, No burns, and No missed areas.

Full-Body Spot Cover:

Facial Spot Cover:

Disposable Spot Size Cover

Equipped with a single-use medical-grade silicone cover, ensuring hygiene and the perfect spacing between the laser lens and the skin.

85%

Outstanding Results

Delivers outstanding results with up to 85–90% hair reduction after the recommended treatment sessions, ensuring high client satisfaction and long-lasting smoothness.

Superior Air-Cooling System (~25 C)

Equipped with an integrated ultra high air-cooling system combined with the Iced Nozzle, the device delivers zero-pain treatments with maximum patient comfort and safety — even at the highest fluence levels.

Swift Performance

Designed with cutting-edge technology, a high frequency rate, and a large rectangular spot size, the system completes comprehensive full-body treatments in just 25 - 35 minutes — combining speed with clinical precision.

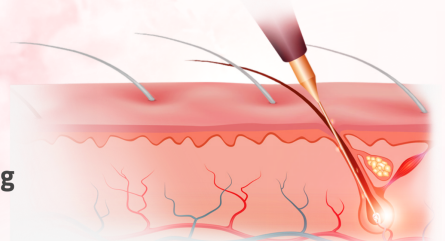

Cost-Effective

An exceptionally cost-effective choice for doctors and aesthetic clinics, this device combines low operational expenses with high patient turnover — ensuring a strong return on investment with every session.

Smart Electrolysis System for Stubborn & White Hair

Electrolysis is the only FDA-approved method for permanent hair removal on all hair colors — including white, grey, blonde, and red. It uses a microcurrent delivered through a fine probe to destroy the hair follicle directly, without relying on pigment, making it ideal for resistant hairs that lasers can't treat.

Technical Specifications

LIGHT SOURCE	New Generation Deep Light Laser Flash Lamp
LIGHT SPECTRUM	640nm - 1200nm
SPECTRUM FOCUS (%80)	1064 - 810 - 755 nm
SKIN COOLING SYSTEM	Compressor cooling system
LOUDNESS (DB)	62 dB
USER SCREEN	15.6» Capacitive Full HD
FIRING SPEED	3 Hz
AIR BLOWING STAGE	10 Ters and Automatic
THE SHOOTING AREA	7.6 cm ²
AVERAGE LIFE OF COLD AIR NOZZLE	500.000 - 700.000 Shots
MAXIMUM ENERGY	35 Joule/cm2
CABLE AND HOSE LENGTH	1,5 m
MAXIMUM POWER CONSUMPTION	6500 Watt
ELECTRICITY REQUIREMENT	230 - 220 VAC / 60 - 50 Hz
WEIGHT / SIZE	142 kg / 153x180x55 cm
